LA BALDOSA DE CEMENTO PIGMENTADO

La baldosa de cemento se introdujo en Chile a principios del siglo XX, traída desde Europa en barcos para hermohear las casonas de la incipiente clase acomodada. Se comienza a fabricar en el país a mediados del siglo pasado, provocando gran expectación por los hermosos diseños y aspecto colorido.

BALDOSAS SÚPER nace en el año 1960, de la mano de su fundador EDUARDO MARTÍNEZ REYES, nuestro padre, que hoy tiene 102 años y continúa ligado a la empresa. Son seis décadas de un trabajo permanente y de gran sacrificio, el propio de empresa pequeña, sometida a los avatares del momento económico.

Hoy la baldosa decorada o mosaico hidráulico se ha convertido casi en un objeto de culto, considerado el antecedente que un maestro especializado requiere 1 día de trabajo para hacer 5 m² de baldosa con un diseño de mediana complejidad. Esta lenta producción hace difícil competir con productos industriales, pero los clientes entienden la diferencia y la valoran.

Favorablemente, hoy el consumo de la gente se ha tornado más responsable y consciente en el mundo entero, volviendo la mirada a productos de larga vida por sobre aquello desechable y temporal. Las maderas nobles, el fierro forjado, el vitreaux, los tejidos a mano y por supuesto, la baldosa de cemento (entre muchos otros), vuelven en gloria y majestad a posicionarse donde siempre debieron estar: en la vida cotidiana de la gente, que merece vivir rodeada de lo hermoso y noble, fabricado a mano por hombres y mujeres de nuestros pueblos.
